Stainless Steel 17-4PH Round Bars

Stainless Steel 17-4PH Round Bars, 17-4ph Square Bars, SS 17-4PH Bright Round Bars, AISI 630 Round Bars, UNS S17400 Hexagonal Bars, DIN 1.4542 Flat Bars, AMS 5643 17-4 PH Hex Bars, ASTM A276 SS 17-4ph Triangular Bars, ASTM A479 SS 17-4ph Threaded Bars, AMS 5643 17-4 PH Hollow Bars Manufacturer & Supplier Dealer in India.

Ubique Alloys Pvt. Ltd is a well-known supplier, trader, exporter and manufacturer of **SS 17-4PH Round Rod**, which has exceptionally good dimensional stability. **Stainless Steel 17-4PH Flat Bars** is a precipitation-hardenable alloy that combines the excellent corrosion resistance characteristic with the added advantage of greater strength and hardness. The increased properties in **Stainless Steel 17-4PH Square Bars** are obtained by adding aluminum and titanium to the nickel-copper base. Aluminum and titanium additions in **Stainless Steel 17-4PH Threaded Bars**, plus controlled heat treat cycles, are responsible for the added strength of this alloy. **Stainless Steel 17-4PH Hollow Bars** combines the corrosion resistance of but gives the added advantage of extra strength and hardness (as a result of its age hardening ability). **Stainless**

Steel 17-4PH Hex Rods can be fabricated readily by hot- and cold-working, machining, and welding. **Stainless Steel 17-4PH Triangular Bars** has found to be resistant to a sour-gas environment.

Major Applications of **Stainless Steel 17-4PH Bars** include pump shafts, doctor-blades and scrapers, oil well tools and instruments, electronic components, springs, valve trim, fasteners and marine propeller shafts. Resistance to hydrogen sulfide makes **Stainless Steel 17-4PH Rods** useful in sour-gas environments making it extremely popular in the oil patch. **17-4PH Stainless Steel Round Bars** meets numerous industrial and international specifications. **17-4PH Stainless Steel Rods** is an age-hardenable alloy which combines the corrosion resistance with high strength corrosion fatigue and erosion resistance.
